

Who We Are

Lumentum delivers game-changing photonics innovation to enable breakthrough advancements in technology that transform the way the world connects, creates, and interacts.

Changing the Industry Landscapes We Serve

Our extensive portfolio of innovative photonic products enables agility, flexibility, and speed throughout the world's communications networks. Lumentum products address the staggering and ever-growing amount of data traversing networks and being processed and stored in cloud data centers. Much of this traffic has been driven by high bandwidth applications such as streaming video and machine vision, and is now surging to even greater heights as a new class of generative AI tools emerges.

Lumentum also produces high-performance industrial lasers, including ultrafast solid-state lasers used in the precision manufacturing of products with exacting standards, including automobiles, solar cells, displays, and semiconductor chips.

In addition, Lumentum has been an industry pioneer and leading provider of advanced diode lasers for high-volume 3D sensing applications used in mobile devices as well as autonomous driving, in-cabin driver monitoring, advanced imaging, and other next-generation applications.

About Lumentum

- Headquartered in San Jose, California with over 20 locations worldwide
- 11,000 employees
- Global marketing, sales, R&D, and in-house wafer fabs/manufacturing, plus a network of contract manufacturers
- Leadership positions in:
 - 400/800G data center transceivers and lasers
 - Telecom transport and transmission
 - Industrial and consumer diode lasers

Financials

- Lumentum FY25 revenue: \$1.65B
- Nasdaq stock ticker: LITE
- Spun out of JDS Uniphase on August 1, 2015

Experience

- More than 40 years experience in the photonics industry
- ~900 R&D engineers
- ~2,100 patents
