# Miniature <br> Opto-Mechanical Switch MOMEX Series 

The Lumentum next-generation miniature opto-mechanical (MOMEX) switch is a single component that provides high reliability under demanding central office and uncontrolled environments. Also, it is GR-1221 qualified.

Collimated beam optics, an epoxy-free optical path, and a specially designed mirror and moving prism mechanism enable excellent performance characteristics. Directly mountable on printed circuit boards, the MOMEX switch is equipped with status contacts to provide an electrical readout of the switch position.

## Features
